info@ecpa-cz.com
Dear Colleagues.

The Educational Centre for Practical Anatomy prepares in cooperation with a team of colleagues a Preparation course aimed at anatomy and instrumentation for upper cervical spine. Cadavers with latex coated vessels and fully equipped working place including C-arms will be available, as well as the traditional background of the Department of Anatomy LF MU Brno.

Best regards

Doc. MUDr. Igor Čižmář, Ph.D.

07:00 - 07:15 Registration

07:15 - 09:00 Welcome
Vertebral artery anatomy
Occipito-cervical fixation
Posterior C1-C2 fixation /Magerl, Goel/
Translaminar C2 fixation
Lateral mass screw fixation
Cervical pedicular screw fixation
Anterior odontoid screw fixation
Transoral approach

09:00 - 09:15 Coffee break
Transfer to the hands-on course cadaver part

09:15 - 12:00 Intensive Cadaver Session

12:00 - 12:30 Lunch

12:30 - 15:00 Intensive Cadaver Session

15:00 - 15:15 Coffee break

15:15 - 16:30 Clinical lectures
Hemodynamic vertebral insufficiency
Vertebral artery BOT
and cervical spondylectomy
Spinal intradural extramedullar tumours
Primary bone tumours
of the cervical spine
Indtradural tumours of CC junction
Spinal AVM
Final Discussion

17:00 Dinner
The Department of Anatomy, MU Brno is a part of a new University Campus which is located in Brno-Bohunice. The Campus can be reached by public transport about 20 minutes from the city centre. Both, from the train and coach stations, you can take the bus No. 60, get off at the bus-stop Nemocnice Bohunice and change to the bus No. 61 or 69. Then you get off at the bus-stop Kamenice. City public transport timetables can be found at www.dpmb.cz. It is also possible to use a parking area which is a part of the Department of Anatomy.
Safety precautions

The course includes a practical part, i.e. working with cadavers, where the infection risk cannot be completely eliminated (as during any other manipulation of biological material). Therefore it is necessary for the participants who take part in the practical part to be appropriately revaccinated. On the basis of our notice the clients are obliged to sign relevant safety affirmation before the course begins. The practical part participants will be supplied with the following disposable protective aids: surgical shirt, trousers, gown, shoe covers, cap, mask, gloves and goggles. The course organizer is not responsible for injuries or damage incurred within the course.

Affirmation of preventive vaccination

I declare that I am appropriately vaccinated against diseases according to the Decree of Healthcare Ministry of the Czech Republic no.439/2000 Coll. of 6th December 2006 about vaccinations against diseases which could be transmitted to me from the biological material during the course. I commit myself to use protective aids which are specified by the course organizer. Thereby I relieve the organizer from responsibility in case of any health damage during the course.

This affirmation will be submitted in order to sign it before the course beginning at the registration.
